

Dear Commissioners:

I am very concerned that the upcoming vote (on June 2) will allow increased centralization of power in the Media by a few large corporations. Such a decision would infringe on the normal competition between various news media and ultimately lead to additional corruption, a dillution of serious news coverage, and an opportunity for a few media giants to control information that the public recieves. I strongly urge the FCC to not allowed additional centralization of the number of media outlets (TV, radio, and print) that can be owned by a single corporation in a specific market. This is not in the public interest!

Sincerely,

Robert L. Beschta, Ph.D.
